It is requested that instructions be given for returning of cheques, bank drafts, or money orders covering unsuccessful bids.

Anyone may ask that, if an offer on one or more parcels is not accepted, it be considered on another parcel or parcels, provided the intent and order of choice is clearly stated, and the amount of the remittance is sufficient to satisfy the fee, rental and bonus on the further choice.

Tenders involving slide bonus offers must only include parcels of a like kind, i.e., all permit or all lease or all drilling reservation. Any tender received contrary to this condition will not be considered.

The right to reject any or all offers received is reserved.

DECISION OF THE MOTOR CARRIER COMMISSION

In the Matter of the Telecommunications Utilities Act, S.B.C. 1973, Chap. 90, and in the Matter of the Energy Act, S.B.C. 1973, Chap. 29, and in the Matter of an Application by Okanagan Telephone Company for Commission Approval of the Agreement to Effect Okanagan Telephone Company's Merger With Its Parent Company, British Columbia Telephone Company, Before Judge R. Ross Sutherland, Chairman, and Gerard M. Morris, Commissioner, Dated October 6, 1978

THIS matter has been brought before this Commission by Okanagan Telephone Company seeking approval of its proposed merger with its parent company, British Columbia Telephone Company. Specifically the application is for approval of the merger by way of sale of assets, approval of the redemption of existing Okanagan Telephone Company Preferred Shares, and approval of the issue (if required) of \$1.75 dividend Subordinated Redeemable Preferred Shares of Okanagan Telephone Company of British Columbia Telephone Company.

The application was brought under section 43 of the *Energy Act* and this Commission has considered that section as well as sections 25 and 42, in all of which it feels its jurisdiction to be founded. These sections read as follows:

Section 43—Unless an order of the Commission is first obtained and published in the Gazette, no energy utility shall consolidate, amalgamate, or merge with any other energy utility.

Section 25—No energy utility that has been granted either a certificate of public convenience and necessity of a franchise, and has commenced any operations permitted by that certificate of franchise, shall cease those operations or any part of them without first obtaining the permission of the Commission.

Section 42—Except in the case of the sale, lease, or other disposition by an energy utility of any of its property in the ordinary course of its business, no energy utility shall, unless the approval of the commission is first obtained, sell, assign, transfer, lease, mortgage, or otherwise dispose of or encumber its property, franchises, licences, permits, concessions, privileges, or rights, or any part thereof, or by any means, direct or indirect, merge, amalgamate, or consolidate its property, franchises, licences, permits, concessions, privileges, or rights, or any part thereof, with those of any other energy utility.

The remaining section of note is section 45 of the *Energy Act*, which reads as follows:

Section 45—(1) The Commission has general supervision of all energy utilities,

and may make such regulations and orders respecting equipment, appliances, safety devices, extension of works or systems, filing of schedules of rates, reporting, and other matters as it considers necessary or advisable for the safety, convenience, or service of the public, or for the proper carrying out of this Act or of any contract, charter, or franchise involving the use of public property or rights.

(2) Subject to this Act, the Commission may make regulations requiring an energy utility to conduct its operations in such a manner that it does not unnecessarily interfere with, or cause unnecessary damage or inconvenience to, the public.

This case causes more concern than would be the case if it were an application to merge two entities, both of which were under the jurisdiction of this Commission. In effect, however, it is an application to take Okanagan Telephone Company out of the jurisdiction of this Commission.

Briefly, Okanagan Telephone Company is and has been the supplier of telephone services in the area of the Okanagan Valley in British Columbia. On October 15, 1966, British Columbia Telephone offered to purchase the outstanding common shares of Okanagan Telephone Company. This offer was conditional on the approval of the respective regulatory authorities, namely, the Public Utilities Commission of British Columbia and the Board of Transport Commissioners for Canada. Subsequently, the approval of both regulatory authorities was received, and as a result, shortly thereafter British Columbia Telephone Company acquired approximately 95 per cent of the common shares of Okanagan Telephone Company. In terms of operations, it has been run since virtually as a district of the parent company. Financially, it has retained its separate identity and has followed the practice of securing the very substantial funds required to finance its construction budget by borrowing money directly from the parent company. These direct borrowings represent the major portion of the Company's debt, for example, the financial statement for the year ending December 31, 1977, indicates that income debentures issued to and loans payable to the parent company were in excess of \$52 million dollars and represented over 64 per cent of the short-term obligations and long-term debt recorded in that statement.

British Columbia Telephone Company is the principal supplier of telephone services throughout the remainder of the Province of British Columbia and is incorporated under an Act of the Parliament of Canada and is declared therein to be a work for the general advantage of Canada. While one may regard this as an historical anomaly, the result has nonetheless been and continues to be that British Columbia Telephone Company is regulated by the Canadian Radio-television and Telecommunications Commission, a Federal body. The result therefore of a successful application for merger would be to take the Okanagan area and to place it under Federal jurisdiction.

Some time was spent during the course of the hearing in discussing the merits of local regulation in general, and the specific benefits of regulation upon the affairs of Okanagan Telephone Company. This Commission feels strongly that the interests of the subscribers and investors in any telephone utility are best served by regulation within the Province. The perspectives and interests of those within a particular area are generally more readily perceived by those who are themselves

situate within that area. Telephone and similar services form a significant portion of the daily affairs of most persons and in the absence of compelling reasons for central regulation, local regulation is preferable.

In this connection it should be noted that while there were no interveners other than J. Peters, who will be referred to later, who opposed the merger, there was received from the Premier of the Province a letter in which it was stated that the Province of British Columbia is seeking to obtain jurisdiction over all telephone services in the Province and expressing concern over the possibility of the Province losing jurisdiction over the portion of telephone communications which it now has so long as Okanagan Telephone Company remains a utility under Provincial regulation. This Commission agrees with the sentiments expressed in that letter but its major concern must be the public interest as set out in section 45 of the *Energy Act*. In this case the Commission feels that the public with which it is primarily concerned are settled by statute as the subscribers to the Okanagan telephone system.

Turning now to the evidence which was called at the hearing, there was very little if any direct benefit shown to accrue to the subscribers of the Okanagan telephone system. The primary reason for the merger is the availability of capital cost allowance from Okanagan Telephone Company which can be used by British Columbia Telephone Company, and Okanagan Telephone Company can benefit from this only in a relatively minor proportion. On the other hand, the subscribers will be losing the benefits of having a more readily available Provincial regulator and having full hearings on rate cases in the Okanagan, as has been the case in the past. There have been substantial advances in regulation in the way of provision of service statistics and scrutiny over the purchasing practices and operations of the Company by this Commission, and the benefit of these may be lost, although certain steps in these directions are being taken between the parent company and its regulator.

In the provision of evidence and material for this Commission and its staff, it is felt that the applicant has been less than well prepared, and at times reluctant to co-operate. Much of the major portion of forecast material as to rates and the future financial affairs of the Company was not given in an up-to-date form until part-way through the hearing. It must be recognized that the onus in the first instance is upon the applicant to provide material to the Commission in support of its application. In dealing with companies of the size involved here and dealing with issues of the seriousness involved here, one would have thought that accurate and up-to-date forecasts of each company, with and without merger, and forecasts of rates would have been provided automatically. Although after provision of such basic material, the Commission, through its staff, might as was the case want other forecasts taking various assumptions into consideration, the provision of basic forecasts should have been virtually automatic. Additionally, the rationale for and the accuracy of certain of the forecast figures were called into serious question.

In the ordinary course of events, the factors outlined above might well result in a rejection of the application with or without invitation to resubmit in future.

In this case, however, there is one overriding concern that outweighs all others with this Commission. That problem is the difficulties which the applicant company might have in the future with financing and the onerous rates which could well be visited upon the subscribers of the Okanagan telephone system in the event that this merger does not go through. At any time, virtually at the whim of British Columbia Telephone Company or its regulator, the financing practices of the subsidiary could be changed, or the subsidiary could come before this Commission with a request for rates based upon a fair return on capital investment. The results of any such change in financing or rate policy could have extremely serious effects on the subscribers and even on the economy of the area served. Unfortunately, this Commission has no assurance from the parent company or its regulator that such a change in policy would not be made. Any such change in policy would probably be within the parent company's rights, and efforts to divert the process might well not be maintained by the courts.

This Commission, therefore, feels in view of this consideration that the application **MUST BE GRANTED**.

In reaching its decision the Commission gave careful consideration to the views and representations of the intervener, but determined that his concerns could not override the fundamental question of the interests of the subscribers.

The Commission hereby orders that the application for approval of the agreement effecting the Okanagan Telephone Company's merger with its parent company, the British Columbia Telephone Company, be and is hereby granted.
